Actionee Project

Sub Category

Subject Software Development Guidelines for DAAC-unique Extensions

## Description of Problem or Suggestion:

No software development guidelines currently exists to guide DAAC personnel in development of DAAC-unique extensions to the EOSDIS.

## Originator's Recommendation

That EOSDIS software development guidelines be extended and/or repackaged to guide development/integration of DAAC-unique extensions.

GSFC Response by: Schroeder

GSFC Response Date 8/11/95

The current ESDIS position is that software development guidelines for DAAC unique extensions to the EOSDIS (i.e. not the ECS) should be delegated to the DAACs. The DAACs responsibility should be to develop maintainable, documented code that meets applicable interface requirements.

This RID is outside of ECS and therefore not inline to the upcoming ECS CDR. ESDIS will take an action to clarify this policy in the future.
